Meeting the Standard for tourism, hospitality and events

Activating and Collaborative Learning for Engaging Classrooms

Date: Monday 10 February 2025
Time: 9:00-15:00pm (AEST)
Location: UQ City Campus, Brisbane
Registration: https://leishman.eventsair.com/cauthe-2025-conference/registration

Description

Online learning technologies have transformed educational experiences by enabling more flexible and structured learning approaches. These digital platforms offer benefits such as personalised learning pathways, ability to track student achievements, opportunities to intervene and support student progress, and activation of previously passive learning contexts. While online learning technologies provide powerful educational tools, they risk fragmenting the learning experience if not carefully integrated with traditional classroom instruction. **Outcomes from the workshop** will include principles for designing active, collaborative, and engaging learning and a design for activating and collaborative learning within a unit/subject, and a framework for topic learning.

Agenda

Time	Item	Responsibility
09:00	Welcome and introduction	Glen
09:10	Explore theoretical foundations	Glen/Mieke
09:30	Identify principles for crafting active and collaborative learning and how these can ensure engaging classes.	Group discussion
11:00	Morning tea	
11:30	Explore examples of active and collaborative learning across a subject/unit, and at the topic level (i.e., learning week) in the areas of pre-class, in-class, and post class.	Glen/Mieke + Group discussion
1:00	Lunch	
14:00	Design active and collaborative learning across a subject/unit, and at the topic level (i.e. learning week) in the areas of pre-class, in-class, and post class.	Group work
14:30	Groups share their designs	Group report s
14:55	Next steps and close	Glen/Mieke
15:00	Afternoon tea	
15:30	Either, the PhD/ECR workshop small group mentoring sessions (by invitation). Or, own time
